MODE INDICATOR

OVERHEAT PROTECTION

The overheat protection device can ensure the bicycle light in a good running temperature condition, so that to protect the LEDs without burning case. If the light is in high temperature during operation, it will dim the light output.

CHARGING

1. Power off.
2. Plug USB cable to USB port.
3. Unplug after fully charged.

* Do not charge over 5V.
* Keep away from flammable objects while charging.
