
FEATURES
- 1 pc. COB 15 chips high brightness red led
- Rechargeable Lithium polymer battery (3.7V 350mAh)
- USB rechargeable
- 3 steady modes, 3 flashing modes
- Quick release universal bracket (fits round and ARGO style bars)
- Low battery, charging and fully charged indicator
- Automatic fully charged cut-off system
- Side visibility
- Recharge time 2hrs
- Water resistant (IPX4)

CONTENTS
CRESCENT
R8-22 (Universal bracket)
2 Orings for mounting:
RS-6 for 20-35mm
RS-7 for 35-52mm
USB-micro USB cable
R8-21 (Bell clip)
Optional accessories:
R8-19 (Rear rack mount bracket)
R8-21 (Saddle rail bracket)
R8-23 (Helmet bracket)
R8-28 (GoPro mount adapter)

SAEIID RAIL MOUNTING (Optional)
1. Loosen the screws in the saddle bracket with the Allen key.
2. Clamp the bracket onto the saddle rail.
3. Align the screw holes, using the Allen key to tighten the bracket.
4. Slide the light forward onto bracket until it clicks into place.
5. Press down release lever to remove.
6. Twist the light body to adjust the vertical angle.

3. Adjust the angle downward to prevent from blinding the oncoming vehicles on the public roads.
4. Do not disassemble the battery or the whole light into water.
5. Unplug the light charger and cable once the battery is fully charged.
6. Do not dismantle the light which will void warranty.
7. Do not load the light on and unattended.
8. Keep the light away from fire and combustible materials.
9. Do not store head unit when not in bright light of direct sunlight.

BATTERY CHARGING AND CARE
1. Turn off the light.
2. Lift the rubber cover.
3. Plug the USB cable into charging port.
4. Plug the USB cable to wall or computer USB socket.
5. Charging indicator will be on. Unplug the cable after fully charged.

LOW BATTERY AND CHARGING INDICATOR
- Low battery
- Charging indicator
- Fully charged

BATTERY CARE
- Do not charge over 5V, the battery will result in damage.
- Keep away from flammable objects while charging as this may lead to fire or battery explosion.
- Battery may get high temperatures during charging (up to 104°F/40°C). The battery capacity may become ineffective about 80% of its value after 300charge/discharge cycles.
- The battery voltage and capacity decrease apparently at low temperature, especially near below 0°F point, the capacity decreases 5%-10% of freezing (under 0°F) decreases 50% at -20°C, the capacity decreases 30% (turn time decreases 70%). The battery performance will return normal when the temperature gets up to 70°F/20°C.
- Keep the battery in cool and dry places when storing. Recharge the battery fully at least every 3 months.

OPERATION
1. Press power button to turn on the light.
2. Press power button to choose modes.
3. Double click power button to toggle between steady and flashing modes.
4. Press power button for 1 sec to turn off the light.

- Unplug the light charger and cable once the battery is fully charged.
- Do not dismantle the light which will void warranty.
- Do not leave the light on and unattended.
- Keep the light away from fire and combustible materials.
- Do not store head unit when not in bright light of direct sunlight.

WARRANTY
MOON lights are covered by a ONE YEAR LIMITED WARRANTY from the date of purchase from a dealer in materials and workmanship. This warranty does not apply to damage due to heat, physical damage resulting from abuse, neglect, improper repair, improper fit, or alterations of the fixture. This covers the lights and cables only. Batteries are covered by 120 days warranty only if the battery is normal level.

All customers should contact the local dealer or regional distributor for warranty service. To make a claim, first contact original dealer or distributor. Some issues may be resolved upon the initial call. If return of the product is requested use returnable method such as FedEx and MOON is not responsible for lost or misdirected packages.

Please include your full contact information (name, address, phone number, and email if applicable), and a description of the issue. For more information please contact us at info@moon-sport.com.
