LOW BATTERY AND CHARGING INDICATOR

Low battery

* Flashing Blue

Charging indicator * Flashing Blue - Charging

* Steady Blue - Charaed

BATTERY CHARGING AND CARE 1. Turn off the light.

- 2. Lift the rubber cover.
- 3. Plug the USB cable into charging port.
- 4. Plug the USB cable to wall or computer USB socket.
- 5, Charging indicator will be on, Unplug the cable after fully charged,

BATTERY CARE

- * Do not charge over 5V, the battery will result in damage. Keep away from flammable objects while charging as this may lead to fire or battery explosion.
- Battery may get high temperatures during charging (up to 104°F/40°C). The battery capacity may become ineffective about 80% of its value after 300charge/discharge cycles.
- The battery voltage and capacity decrease apparently at low temperatures, especially near or below ice point. The capacity decreases 5%-10% at freezing (burn time decreases 50%). At -20°C, the capacity decreases 30% (burn time decreases 70%). The battery performance will return normal when the temperate gets up to 70°F/20°C.
- Keep the battery in cool and dry place when storing. Recharge the battery fully at least every 3 months.

WARNING Understand country lighting laws and regulations before use.

- Do not shine directly in the eyes.
- Light may get hot when in use.
- Adjust the angle downward to prevent from blinding the oncoming
- vehicles on the public roads. Do not submerge the battery or the whole light into water.
- Unplug the light, charger and cable once the battery is fully charged.
- Do not dismantle the light which will void warranty.
- Do not leave the light on and unattended.
- Keep the light away from fire and combustible materials.
- Do not store head unit when hot or straightway after use.
