
FEATURES:
- 130 dBpA Rectangular GOB high-efﬁciency red LED
- CNC Aluminum heat sink casing
- Light sensitive auto ON/OFF
- Independent memory function
- Auto slave mode
- 13 adjustable strobe patterns
- Flash charging: Lithium polymer battery (3.7V 650 mAh)
- Quick release underwater bracket (US mount) and ABCR style band
- One battery, charging and fully charged indicator
- Auto slave fully charged UV system
- 9/8 visibility
- Water resistant (IPX 6)

CONTENT:
- ARCTURUS AUTO PRO
- 2 Designs for mounting: US and ABCR
- 35′ or 50′/sec (100-160 mätt)
- 35′ or 50′/sec (100-160 mätt)
- 1 (1 to 36)
- 21 (21) (4)
- 27 (27) (4)
- Optional accessories:
  35-17 (21) 35-17 (21) 35-17 (21)
- 35-21 (35-21) 35-21 (35-21)
- JE-1176 (JE-1176) 300 (JE-1176 300)

LOW BATTERY CHARGING AND INDICATOR:
- Automatic status
- Flashing status - flashing orange
- Flashing status - flashing blue
- Fully charged - steady blue

BATTERY CHARGING AND CARE:
- 1. Turn off the light.
- 2. Of the rubber cover.
- 3. Use a USB cable in charging port.
- 4. Use the USB cable to wall or computer USB socket.
- 5. Charging indicator: On when the battery is fully charged.

OPERATION:
- Press power button to turn on the light.
- Press power button to choose modes.
- Double press power button to toggle between steady and flashing modes.
- Press power button for 1 sec to turn off the light.
- With Mode Memory function the light储存s previous mode upon manual usage.
- Remote switch operation is same as above.

REMOTE SWITCH INSTALLATION (Optional):
1. Connect the remote switch by using the tab part.
2. Pull one end of the belt go through the belt handle.
3. Align the button on the remote switch to the corresponding button on the light.
4. Please pull the wire ends tightly.

BATTERY CHARGING AND CARE:
- Do not charge over 5V. The battery will be damaged in result. The battery cannot be overcharged.
- Keep away from flammable objects while charging or this may lead to fire or battery explosion.
- Battery may get high temperature during charging (up to 104°C/210°C). The battery capacity may become ineffective about 40% of its rated capacity after 100 charging cycles.
- The battery voltage and capacity decrease oppositely at low temperatures, especially near a border (below 0°C). The battery decreases 5% for every 1°C decrease.
- The battery cannot be charged under 0°C.
- The battery performance will return normal when the temperature gets up to 20°C.

SEAPOST MOUNTING:
1. Choose the step to ﬁt in the sea post.
2. Make sure the step is clicked in place of the hook.
3. Hold the light on the sea post.
4. Wrapping rubber strap around sea post and stretching strap around hook to secure.
5. Make the beam memory function.
6. Press down release lever to remove.

90° SWIVELING:
- With Mode Memory function the light stores previous mode upon manual usage.
- Remote switch operation is same as above.

WARNING:
- Unreeled country lighting laws and require batteries.
- Batteries must be in use.
- Lithium battery may not be charged.
- Adjust the angle downward to prevent view of oncoming vehicles on the public road.
- Do not remove.
- Do not recharge the battery at the whole light into water.
- Do not charge the battery at the whole light into water.
- Do not use the battery if it leaks.
- Do not work near live power.
- Keep the battery away from live power.
- Do not dispose of in trash.

All customers should contact the local distributor for warranty service. To make a claim, the customer must provide the following information and proof of purchase. The product must be returned to the store where it was purchased or to a Moonrser authorized service center. KIT MOONRser reserves the right to refuse any returned products or services. The following is the 1-year warranty service. The battery is covered by 1-year warranty on batteries. All other parts are covered by 1-year warranty. Do not return unused batteries for replacement. A complete copy of the warranty is available at www.moonrser.com.
