OVERHEAT PROTECTION
The overheat protection device can ensure the bicycle light in a good running temperature condition, so that to protect the LEDs without burning case. If the light is in high temperature during operation, it will dim the light output.

CHARGING
1. Power off.
2. Plug USB cable to USB port.
3. Unplug after fully charged.
* Do not charge over 5V.
* Keep away from flammable objects while charging.

WARNING
- Understand country lighting laws and regulations before use.
- Do not shine light directly into eyes.
- Do not mount near wireless computer.
- Do not blind the oncoming vehicles. Always adjust the angle downward.
- Do not submerge the light into water.
- Keep light in cool and dry place when storing.
- Fully recharge the light at least every 3 months during storage.
