**METEOR**

* Keep the battery in cool and dry place when storing. Recharge the battery when the temperate gets up to 70°F/20°C. The battery performance will return normal when especially near or below ice point. The capacity decreases 5%-10% at 50°F/10°C.

* After 300 charge/discharge, the battery capacity may drop to around 80%.

* Battery may get high temperatures during charging (up to 104°F/40°C). Do not charge over 5V, the battery will result in damage.

* Do not dismantle the light which will void warranty.

* Unplug the light, charger and cable once the battery is fully charged.

* Remote switch operation is same as above.

**BATTERY CHARGING AND CARE**

1. Turn off the light.
2. Lift the rubber cover.
3. Press down release lever to remove.
4. Plug the USB cable to wall or computer USB socket.
5. Charging indicator will be on. Unplug the cable after charging.
